

Disaster Preparedness & Flood Prevention Bond Act of 2006

Flood Protection

This \$4.09 billion general obligation bond proposal on the November 2006 ballot would pay for levee repairs and improvements, upgrade flood protection for urban areas, improve emergency response capabilities, and provide grants for stormwater flood management projects.

State-Federal Project Levees and the Delta	\$3 billion
Flood Control Subventions	\$500 million
Flood Protection Corridors, Bypasses and Mapping	\$290 million
Stormwater Flood Management Grants	\$300 million
TOTAL	\$4.09 billion

Highlights

- Repair and improve levees and other flood control facilities in the Central Valley and Delta
- Leverage federal and state dollars for flood protection and disaster preparedness
- Improve flood protection for urban areas
- Continue Delta Levee Subventions and special flood control projects to reduce the risk of Delta levee failure
- Fully fund backlog of state's share of flood control projects outside the Central Valley and fund future activities
- Create new levees, construct and preserve setback levees, flood corridors, and bypasses
- Assess levee integrity and flood hazards, and use this information to update flood maps of the Central Valley and alluvial fans
- Provide grants to local entities for stormwater runoff projects

Floods Affect All Californians

- Loss of life and property
- Economic consequences
- Delta levee failures could disrupt water supply to 23 million Californians in the Bay Area, Central and Southern California.
- The state is liable for flood damages caused by levee failures, so all taxpayers foot the bill for these disasters.
